DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by D'Alfonso et al. (U.S. Patent No. 6,313,868 B1).

D'Alfonso et al discloses a control apparatus in Fig.2 ; a history generating section comprises the microprocessor 14 and memory 34 described as writing history information into the memory 34 such as length of operation time, total number of uses etc; and an information output section is inherently disclosed. D'Alfonso discloses that the information history is used to perform maintenance and to allow manufacturers to understand the working environments that the camera 3 is used in. This inherently requires an output section and display device in order to know the history information that is stored in the memory 34.
